15.20-16.00	<b>Coffee networking</b>

# Definition and purposes of surveillance

- Public health surveillance is the **ongoing systematic collection, analysis, and interpretation** of data
- closely integrated with the timely **dissemination** of these data to those responsible for preventing and controlling disease and injury [Thacker and Berkelman 1988]

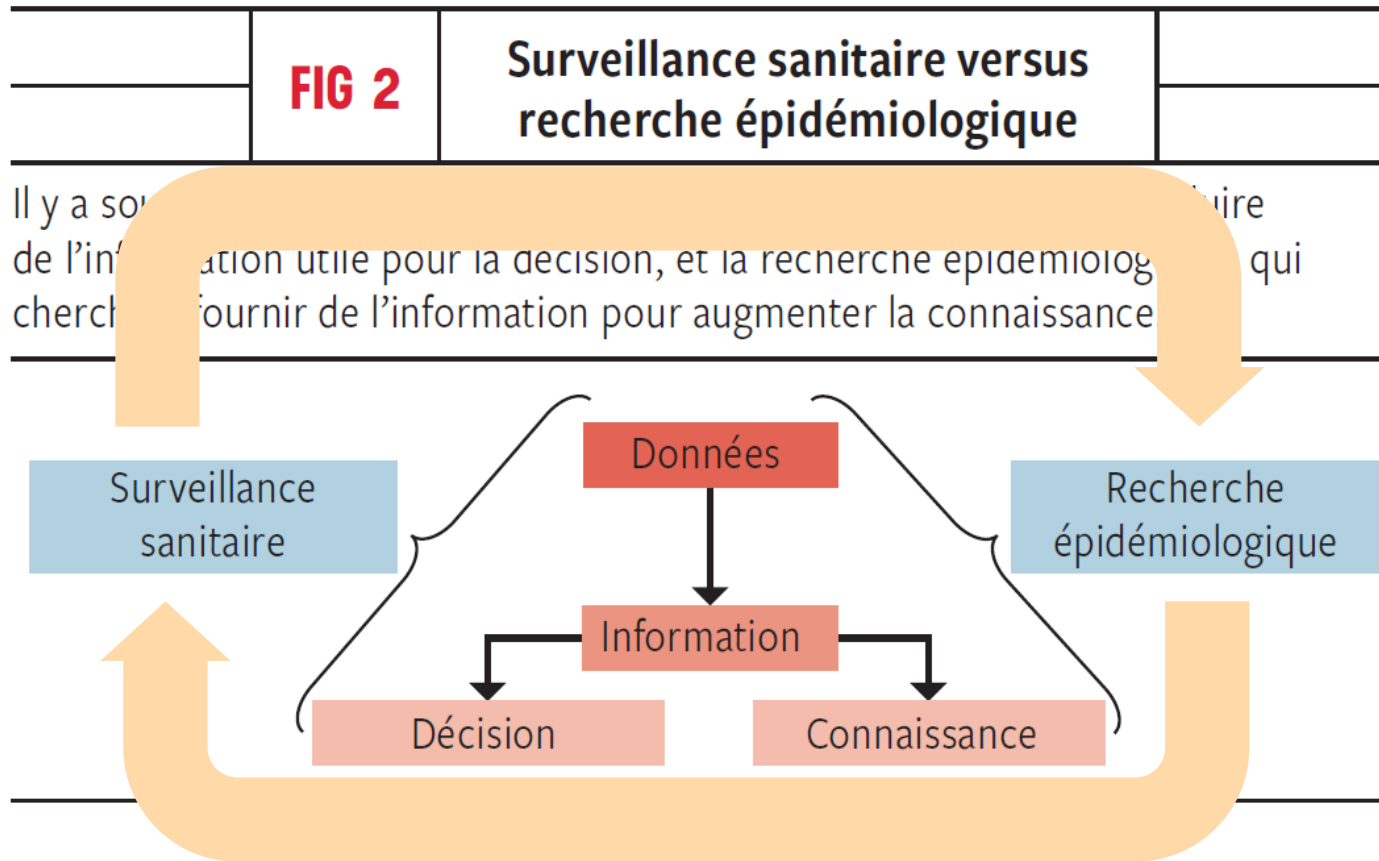

**To provide information useful for decision and action in public health** [Thacker and Berkelman 1988]

# Population health monitoring

Verschuuren M & van Oers H 2020

# Population health monitoring vs research

Chiolero & Buckeridge. JECH 2020, Chiolero et al RMS 2021

## Next meeting

- Does the meeting meet expectations?
- Is the format suitable?
  - Annually at Obsan/FSO, Neuchâtel
  - Short, timely, related to an Obsan topic
- Suggestions for topics, presentations, and discussions are welcome

# Coffee & Networking

**THANK YOU!**
